Figure 1: Dashboard overview showing Total Leads, Emails Sent, and Reply Rate

Metric	What It Shows
--------	---------------

Total Leads	All companies in the database across all campaigns
-------------	--

Emails Sent	Total outreach emails successfully delivered
-------------	--

Reply Rate	Percentage of recipients who wrote back
------------	---

Reply Rate	Empty?
------------	--------

If you see a dash (--) instead of a percentage, IMAP accounts have not been configured yet. See Section 05.

03

Sent Email Log

Menu: Click **Sent Log** in the top navigation.

This page shows **every single person who was emailed** across all campaigns. This answers the most common question: "Did we already contact ABC Construction?"

Sent Email Log

Every recipient emailed across all campaigns. 788 total rows.

Search company or email

e.g. ABC Construction or john@example.com

sent: 788

Figure 2: Sent Email Log showing recipients, subjects, status, and timestamps

Columns Explained

Column Description

Company	The recipient's company name
Recipient Name	Name and email address
Subject	The email subject line sent
Email #	1 = first touch, 2 = follow-up
Tier	A (aggressive) / B (nurture) / C (slow burn)
Status	sent / failed / replied / bounced
Sent At	Exact timestamp of delivery
Pro Tip	

Filter by failed status to find bad email addresses that should be removed from future campaigns.

04

Daily Performance Report

Menu: Click **Reports** in the top navigation.

Day-by-day summary of your email campaigns. Use it to spot trends and catch problems early.

Daily Performance Report

Day-over-day email performance from runs.log + sequences.csv.

TOTAL SENT

789

TOTAL FAILED

0

DATE	SENT	FAILED
2026-05-04	0	0
2026-05-03	88	0
2026-05-02	100	0
2026-05-01	100	0
2026-04-30	100	0
2026-04-29	100	0
2026-04-28	100	0
2026-04-27	100	0
2026-04-26	100	0
2026-04-25	1	0

Figure 3: Daily Performance Report with sent, failed, replied, and bounced counts

Column	Meaning	Healthy
Sent	Emails delivered that day	Matches daily target
Failed	Could not deliver	Ideally 0
Replied	Recipients wrote back	Needs IMAP
Bounced	Invalid addresses	<5% of total
Delivery Rate	$\text{Sent} / (\text{Sent} + \text{Failed})$	>95%
Reply Rate	$\text{Replied} / \text{Sent}$	2-10%

Watch For

If **Delivery Rate** drops below 95%, your email list needs cleaning. If **Reply Rate** is below 2%, your subject lines or targeting may need adjustment.

05

IMAP Settings (Critical)

Menu: Click **IMAP** in the top navigation.

This Is Required

Without IMAP, the system **cannot** track replies, detect bounces, calculate reply rates, or trigger follow-ups.

IMAP Settings

Manage reply-tracking

How to get a Client ID

1. Go to your Google
2. Scroll down → **App**
3. Select app: *Mail*, d
4. Copy the 16-chara
5. Paste it below — y

For non-Gmail provid

Set up via Telegram

You can also add IMA

→ Bot will ask

Figure 4: IMAP Settings page where you add and test email accounts

What You Need

- A **Gmail** or **Google Workspace** email address
- An **App Password** (NOT your normal Google password)

Generate an App Password

- 1
Go to `myaccount.google.com/apppasswords`
- 2
Sign in with your Google account
- 3
Select app: **Mail**
- 4
Select device: **Other** -- type "Mirae Portal"
- 5
Click **Generate**. Copy the 16-character password immediately.

Add Account in Portal

- 1
Go to **IMAP Settings**
- 2
Click **Add IMAP Account**
- 3
Fill: Email, App Password, Server (`imap.gmail.com`), Port (993)
- 4
Click **Save**, then **Test Connection**
Do For Every Sender

If your team uses multiple accounts (Louis, Melvin, Andrew, admin), each person must add their own IMAP account.

06

Replies

Menu: Click **Replies** in the top navigation.

Shows every response from recipients. Each reply is automatically analyzed for sentiment.

Replies

0

Total Replies

Filter:

All

Positive

Neutral

Negative

Replies are

Figure 5: Replies page (currently empty -- IMAP not yet configured)

Sentiment	Meaning	Action
Positive	Interested, wants a call	Follow up quickly
Neutral	Asking questions	Send details
Negative	Not interested	Do not follow up
Unsubscribe	Wants to opt out	Respect immediately
Empty Page?		

This page is empty until: (1) IMAP accounts are added, and (2) the tracker has run at least once. Click **Run Tracker** manually to populate it.

07

Deliverability

Menu: Click **Deliverability** in the top navigation.

Checks whether your domain is properly configured for email sending. Poor configuration means emails land in spam.

Email Deliverability

Domain: `miraeadvisory.com` · Last checked: 2026-05-03

MX

✓ Pass

No issues found

SPF

SPF does not include
Gmail/Workspace, as
→ SPF uses ~all (so
auth.

Recommended Fix Order

1. Enable DKIM in Google Workspace Admin → Apps → Google Workspace → Gmail → Auth
2. Ensure SPF includes `include:_spf.google.com` for Google Workspace senders
3. Add DMARC if missing: `v=DMARC1; p=quarantine; rua=mailto:admin@YOURDOMAIN`
4. Once DKIM + SPF confirmed, tighten DMARC from `p=none` → `p=quarantine`

Suppression List (0 entries)

EMAIL

Figure 6: Deliverability page showing domain health check form

Run a Domain Check

1

Enter domain: miraeadvisory.com

2

Click **Run Check**

3

Review SPF, DKIM, DMARC, and Health Score results

Check	Pass	Fail
SPF	Server authorized to send	Emails may be rejected
DKIM	Signature valid	High spam risk
DMARC	Policy enforced	Receivers unsure
Health Score	90+ excellent	Below 70 needs fix
Fix DKIM Failure		

If DKIM shows FAIL, log in to **Google Workspace Admin** -- Apps -- Google Workspace -- Gmail -- Authenticate email -- Start authentication. Wait 1-2 hours, then re-check.

08

Leads

Menu: Click **Leads** in the top navigation.

Figure 7: Leads list showing files by stage with row counts and tier breakdown

Browse every lead file. Each card shows filename, stage, row count, emails, and tier breakdown.

Stage	Meaning
leadgen	Raw leads from search
enriched	Contact info extracted
verified	Emails verified deliverable
outreach	Ready for campaigns
sequences	Assigned to email sequence

Click any file to open the detail table. You can search, sort, filter by sendability/tier, and bulk delete rows.

Deletion Is Permanent

Bulk delete rewrites the CSV in-place. There is no undo. Export a backup first.

CAMPAIGN CONTROLS

☐ Pause Campaign

☐ Skip Today

[+ New Sequences](#)

You can also manage this campaign via Telegram — send commands to @miraeclawbot

RUN HISTORY

Figure 8: Outreach dashboard showing campaign status and control buttons

Button	Use When	Effect
Pause	Holiday, fixing issue	Stops all future sends
Resume	Ready to send again	Re-enables daily 8am cron
Send Now	Time-sensitive offer	Immediate send
Skip Today	Skip one day	Resumes tomorrow

Watchdog Banner

A **red banner** saying "3+ consecutive failures" means the campaign auto-paused. Common causes: expired SMTP password, suspended Google account, or connectivity issues. Fix the root cause, then click **Resume**.

Sequence Wizard

To generate new emails: Click **Outreach -- + New Sequences** -- select a lead file -- enter sender name -- click **Generate Sequences**.

Note

The wizard only prepares emails. They are sent by the daily cron at **8:00 AM SGT**.

10

Common Questions

Q: Why is Reply Rate empty?

A: You haven't added IMAP accounts. See Section 05.

Q: Why is the Replies page empty?

A: No IMAP, or the tracker hasn't run. Click Run Tracker in IMAP Settings.

Q: How do I know emails are sending?

A: Check Dashboard -- Emails Sent, or Daily Reports for day-by-day numbers.

Q: Can I see exactly WHO was emailed?

A: Yes -- go to Sent Log and search by company or email.

Q: What does "campaign exhausted" mean?

A: All leads in the sequence have been sent. Generate new sequences or request a fresh lead search.

Q: Is my data safe?

A: Yes. Password protection, CSRF tokens, and root-only file permissions (0600) for all credentials.

Q: What if I accidentally delete leads?

A: Deletion is permanent. Export a backup before bulk deleting.
